P(egs) bioinformatics 2020

A short introduction to bioinformatics skills and tools

Have you ever thought "I need more computer skills for my research" but didn't know where to start? You are not alone!

This short series by computational postgrads & postdocs will introduce some of **the key bioinformatics skills and tools** essential to modern research.

Michael Smith Lecture theatre Every other Friday @ 3PM (No sign up required!)

24th Jan Introduction to R

 7th Feb Analysing data with GSEA, Networks and Pathways

21st Feb Introduction to Python

6th March Bioinformatics Good Practice:

Data Organisation & Consistency

20th March Linking bioinformatics to health

data outcomes

3rd April Version control
